DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

The drawings are objected to under 37 CFR 1.83(a) because they fail to show the differences between powered roller conveyor 4 and intermediate rollers 6, for example in Figs. 1 and 2, rollers 6 and the arrow pointing to roller 4 seem like pointing out to the same rollers, it is not clear what is the difference. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 3, 5, 15, and 16 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 3, 5, 15, and 16 are not further limiting the subject matter of claim 1, in specific claims 3, 5, 15, and 16 describing the means as claimed in claim 1, line 10 "...synchronous drive means.."; line 12 "...pressure means..."; and line 13 "...locating and retaining means..", therefore, they are not in title of 112 6th for broaden the claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is not clear in the specification of the invention to what is the exact difference between powered roller 4 and the intermediate rollers 6, it is not clear to how it works?

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3721

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In (claim 1, lines 7 and 8) "...a roller conveyor (4)... intermediate rollers (6)..." it is vague, indefinite, and/or confusingly worded because it is not clear as to the exact rollers 6 intermediated between what? and to what is the difference between roller 4 and the intermediate rollers; etc.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hooper 6612974; Benzoni 6565499, Muessig 6309336, Weiermann 5540647, Teik 5014582, Runge 4979933, Nemec 4419088, and Miiller 3897051 disclose different forming machining to produce an article.
